

Directions for Wind Power Survey Data:

Total the responses to each question from the class surveys. Represent the answers as percentages if preferred.

Create separate pie graphs to represent the answers to each of the 3 questions.

Label each graph to be sure that the reader can tell which graph represents the answers to which question.

1. Should the USA use more windmills to generate electricity? Yes: ____ No: ____
2. Should Kansas use more windmills to generate electricity? Yes: ____ No: ____
3. Would you like a windmill or wind farm to be built in your city/town or near your house? Yes: ____ No: ____
